

WARDROBE AUDIT

Are you running out of closet space?

Is there more chaos than harmony in your wardrobe?

Do you regularly wear less than half of your clothes and accessories?

Are you having a hard time parting with items for any number of reasons?

This service will provide you with the most fun you have ever had cleaning out your wardrobe! Have an F3 Consultant assess your wardrobe and/or accessories to help you clean out the clutter and coordinate outfits that suit your shape and style.

During this process an inventory will be taken of the core garments that are best suited to you in your existing wardrobe. Your Lifestyle Profile will be developed and then together you will create a shopping list of the items that you need to replace.

These items will mix and match with your existing wardrobe to create entirely new outfits which are ideally suited to you. Specific recommendations will be made based on this assessment so you will know exactly what colour, style and fabric for each item you need to purchase.

If you have already had your Personal Style Solutions Portfolio created, this is the next step in organising your life and developing your own personal style and unique image.
