

COLOUR ANALYSIS

Do you know what colours suit you the best?

Do you often look washed out, lifeless and tired?

Do you buy clothes that you only wear once or twice?

Does your wardrobe consist of clothes that are mainly black?

The colours you wear are the first thing that people notice about you when they see you. Colour makes an immediate impact and leaves a lasting impression. In essence there are 3 sets of colours; those you like which you are naturally drawn to, those that are in season which are dictated to you by fashion, and those that look the best on you.

These three sets of colours can be totally different from each other and by learning which work the best for you is a great way to start purchasing clothing and make-up that you will wear over and over again. Always remember, a garment purchased in a great cut but the wrong colour and vice versa will never be a great buy.

After completing the Colour Analysis Programme you will find that shopping for clothes, accessories and make-up will become quicker, easier and more cost effective. Your compact Personal Colour Swatch and Personal Colour Solutions Profile Booklet will provide you with the knowledge and know-how of choosing the right items to suit you.
